SPRINGVILLE, ALABAMA -- Fontaine Heavy-Haul, the recognized technology leader and innovator in the lowbed trailer industry, is introducing a new trailer that carries heavy loads in a lighter package – the new Fontaine Magnitude® 55L.

"The Fontaine Magnitude 55L is designed for haulers that do not need a spread axle setup and want to maximize their payload," explained Todd Anderson, VP Sales and Marketing. "Since the new Magnitude 55L operates close coupled only, our Engineering Team managed to shed 2,000 pounds in the design. So if a hauler only needs 3 or 4 axles close coupled, the new Magnitude 55L will carry an additional ton of payload," Anderson concluded.

This advanced technology lowbed trailer handles 55 tons in just 13 feet. Fabricated with 100,000# minimum yield steel flanges, the Magnitude 55L is built tough and designed to provide years of reliable service. The trailer boasts a 26' clear deck length and a loaded deck height of 18" with 6" of ground clearance. It features the most versatile hydraulic removable gooseneck in the industry; it can be connected and disconnected in a matter of seconds... not minutes, and it can connect/disconnect on uneven ground.

A wide variety of accessories are available. Your local Fontaine Heavy-Haul dealer can help you specify the right configuration for your application. For more information contact Greg Smith, VP Marketing and Business Development, Fontaine Heavy-Haul, 5398 US Highway 11, Springville, AL 35146 • 800-633-6551 x826 • www.fontainetrailer.com
